Applied Cardiopulmonary Pathophysiology 3: 365–367, 1991.

Volume contents

Vol. 3, No. 1: Lung Injury

Editorial
O. Prakash 1
Surfactant replacement
B. Lachmann 3
The pharmacologic management of acute and chronic airflow obstruction
T.L. Petty 13
Early treatment and the recovery phases of ARDS
T.L. Petty 21
Identification and management of the adult respiratory distress syndrome
T.L. Petty 33
Postpneumonectomy pulmonary edema
R.M. Peters 43
Tailoring lung surgery to preoperative lung function
R.M. Peters 53
Postpneumonectomy pulmonary edema: A case report
B. van den Berg & C. Hilvering 61
Alveolar surface tension and acute lung injury
C. Bredenberg & G. Nieman 67

Special article

The pharmacology of positive inotropic agents in acute heart failure
J.R. Parrat 85

Vol. 3, No. 2: Airways and Oxygen

Editorial
O. Prakash 95
Oxygen transport in the critically ill patient
D.H. Ingbar & S. Nair 97
Molecular mechanisms of pulmonary oxygen toxicity
A.B. Fisher 121
The diagnosis and management of inspiratory muscle fatigue
P.T. Macklem 129
A new approach to the prevention and the treatment of acute respiratory failure in the adult and the neonate
T. Kolobow, L. Gattinoni, M. Solca & A. Presenti 135
Treatment of airway complications
H.C. Grillo 147
Resection and reconstruction of central airways to preserve lungs
H.C. Grillo 161
Office spirometry
T.L. Petty 169

Current status of home oxygen therapy
T.L. Petty 177

Special article

Non-invasive and invasive monitoring in anesthesiology and intensive care
P.D. Lumb 189

Vol. 3, No. 3: Clinical applications in lung and heart diseases

Editorial
O. Prakash 209
Respiratory monitoring in the ICU
M.J. Tobin, K.L. Yang & A. Jubran 211
Hemodynamic effects of mechanical ventilation
M.R. Pinsky 219
Status asthmaticus
M.J. Tobin 229
Ventricular support by synchronized jet ventilation
M.R. Pinsky 235
Mechanics of the perialveolar interstitium of the lung
M.R. Glucksberg 247
Pathophysiology of pleural effusions associated with pulmonary edema
J.P. Wiener-Kronish 253
Pulmonary vasoregulatory mechanisms are altered during general anesthesia
P.A. Murray 261
Assessment of adequacy of oxygen transport in the critically ill
M.R. Pinsky 271
Pulmonary artery catheter problems
M.J. Tobin 279
The mass spectrometer in the clinical practice of anaesthesia
A. Spence & D. Weatherill 287

Calendar 293

Announcement 294

Vol. 3, No. 4: Cardiopulmonary Physiology and Bronchoscopy

Editorial v
Advances in pulmonary gas exchange: update on inert gas studies in adult respiratory distress syndrome (ARDS)
R. Rodriguez-Roisin & J. Roca 295
Functional residual capacity (FRC) and airway resistance after treatment with CPAP in patients with chronic bronchitis and increased FRC
E.F. Christensen 307
The significance of cell pH changes in metabolic acidosis
R.D. Cohen 313
Bronchoscopy in intensive care
M.J. Tobin & G.E. D'Alonzo 319

Current aspects of near drowning
A.D. Simcock 327
Role of sympathomimetic amines during cardiopulmonary resuscitation
K.H. Lindner, F.W. Ahnefeld 333
The influence of catecholamines on plasma potassium concentration
A. Kaltofen, K.H. Lindner & F.W. Ahnefeld 337
Oxygen delivery and utilization
D.R. Dantzker 345
Continuous hemodynamic monitoring: an integrated invasive-noninvasive approach using the fick principle
I.L. Cohen, R.J. Perkins, Z. Bilen & P.D. Lumb 351

International conference calendar 361
